Re; **Docket No. NG-0051 / PI 130**

This letter is in support of the proposed pipeline construction project by Nebraska Resources Company, a wholly owned company of Seminole Energy Services, LLC.

We being one of the Biofuels companies that are in the process of constructing 4 plants in the state would like to see this project move forward.

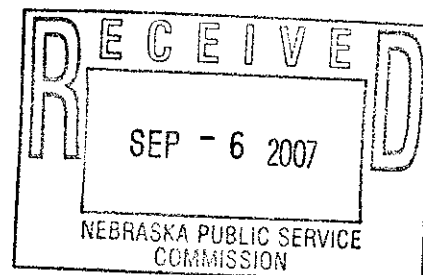

This project would add to the states economy in many ways while being constructed and continues to add to the state as well as many of the County, City and Village economy's that this proposed pipeline will service for many years to come.

Our 100,000,000 gallon per year ethanol plants would be a user of the pipeline in conjunction with other biofuel and industries / manufactures.

This project is a win / win situation for all within the state of Nebraska and enables companies like ours to move forward with our projects.

Sincerely

Dennis Bravo - President
Midwest Ethanol Producers, LLC
